

1. Download file onto your hard drive. Use the downloaded file size as reference for the required hard disk space.
2. Execute the file that you downloaded in step 1. Installation starts automatically after self-extraction.
3. Follow the instructions from the Installation Wizard to complete the installation. Refer to the [Scanner Central Admin User's Guide](#) for the details of how to install the "Scanner Central Admin Server".
4. When the installation is completed, confirm the version. Refer to [How to Confirm the Software Version](#).

## Attention

- Install Microsoft® .NET Framework 4.0 or later before installing SCA Server. To install SCA server 4.4 or later, Microsoft® .NET Framework 4.0 or later is required.
- Update SCA Console before updating SCA Server. For details, refer to the table of [Scanner Central Admin Console connection Correspondence Table](#).
- Notice for N7100 users  
To update N7100 system configuration or edit job settings through Scanner Central Admin, install Microsoft® .Net Framework 4.5 or later onto a system that is working with both Scanner Central Admin Server and Scanner Central Admin Console. However, note Microsoft® .NET Framework 4.5 or later cannot be installed onto Windows Server® 2003 R2. To distribute N7100 system configuration and job mode settings through Scanner Central Admin, use Windows Server® 2008 or later.
- Windows Server® CAL is separately required.
